Industrial Process Chiller

Features

Fully automatic compact air cooled skid mounted unit

Wide range of capacity from 1 Tr to 50 Tr with Temperature of water / brine From 20 C to -20 C

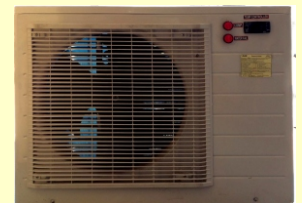

Main parts are designed and manufacture by ENGGTEMP in its plant

Main critical components of the unit i.e. Expansion valve, L.P/H.P Switch, drier etc. of international stranded

control penal with micro base type controller

high Quality product due to stage wise inspection & testing before despatch

12 month guarantee and backed by most efficient customer support

THE INDUSTRIAL RECIPROCATING CHILLERS FIND APPLICATIONS IN THE INDUSTRIAL CONDITION WHERE ONE APPLICATION IS COMPLETELY DIFFERENT FROM THE OTHER APPLICATION. THE CHILLERS ARE MANUFACTURED USING SPECIFIC MATERIALS THAT ARE CAREFULLY CHOSEN AS PER THE PROCESS FLUIDS USED IN SPECIFIC PROCESS REQUIREMENT

ADVANTAGES

- EFFICIENT HEAT TRANSFER BETWEEN REFRIGERANT AND WATER
- LOW WEIGHT
- EASY FOR INSTALLATION
- SAFETY DEVICES PROVIDED

Silent Features

- LP/HP Switch
- Compressor Overloads Trip
- Voltage SPP & RP
- Flow Switch

Note

- Higher capacity Machine Details on request
- Specifications are subject to change without any notice for product improvement
